DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18 drawn to the tether and bag panels, classified in class 24 or 383, subclass 265+.
 - II. Claims 19-23, drawn to a fabric panel, classified in class 2 or 442 in various subclasses.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are all related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention the fabric blank or the tether or the bag panel could be used as a separate utility, such as the fabric blank could be used for any garment having any shape of a pattern, not specifically an airbag and additionally the as required by Applicant's claims it is not necessary that all parts of the airbag be made from the same fabric blank. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Ms. Charlotte Wilson on 12/04/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
